

Hello? Isn't this America? Freedom of Choice and all? No ONE radio station or ONE TYPE of station owns the rights to the WEATHER DO THEY??????????  
This is a really stupid issue. Of course Satellite radio stations should be able to tell us our local weather and especially TRAFFIC--  
I commute to Los Angeles and I DEPEND ON XM RADIO's DEDICATED TRAFFIC CHANNEL--  
On regular radio, the best they can do is give me traffic conditions every 6 minutes--That's not nearly as effective as XM's CONSTANT 24/7 WEATHER AND TRAFFIC CHANNEL---

But whether you use the service or not, freedom of competition dictates that ANYONE has the right to tell you the weather and traffic and then the consumer will decide which service they prefer.
